

CHAPTER 5

DOD-SPONSORED CARGO

5000. Purpose. This chapter outlines customs and agricultural requirements for entry of DOD-sponsored cargo, except personal property, into the **CTUS**.

5001. Scope. This chapter applies to all DOD activities whose mission involves any **responsibility** for processing and shipping DOD-sponsored cargo from initial preparation for shipment through certification of cargo for border clearance purposes.

5002. **DOD-sponsored cargo.** DOD-sponsored cargo includes the following:

- a. Military support cargo.
- **b.** Cargo controlled by DOD in the interest of national security.
- c. Military aid cargo shipped in US flag **air-** craft and vessels.
 - d. Military Services exchange cargo.

Note: Human remains carried on DOD-sponsored transportation will be handled under the procedures outlined in this chapter.

Customs. US Federal regulations provide that all, Government imports are subject to inspection and/or examination and entry requirements. To. satisfy these requirements; it is mandatory that all DOD-sponsored cargo be free of contraband and agricultural pests; be declared to the customs officer at the first port of entry; and be available for any appropriate border clearance-" inspection. The declaration of such cargo is the responsibility of the operator of the air or ocean terminal having jurisdiction over the port of entry, except as outlined in paragraph 5005e below.

5004. Inspection/examination procedures. Except as stated in paragraph 5004d below, all DOD sponsored cargo will be inspected or examined, as appropriate, within the oversea area, preferably at the point of origin, prior to shipment of the cargo to the CTUS.

This inspection/examination will be conducted by MCI personnel, and can only be waived in those instances where inspection/examination is impracticable and/or uneconomical. Requests for waivers will be forwarded through command channels to **HQDA**, addressed as shown in paragraph 1006. Specific inspection/examination procedures are as f ol-10WS:

a. Prior to unit moves, all military impedimenta which will be entered into the CTUS will be inspected or examined, as deemed appropriate by commanders and/or Military Customs Inspectors. Military impedimenta will be inspected/examined at the time it is placed in boxes, crates, containers, sea vans, or similar ::::: ". receptacles for movement, and will then be **secured** until departure from the oversea area. . Vehicles and similar items, which will be shipped essentially in as-is condition, will be inspected/examined and secured, immediately prior to loading on the aircraft or vessel on which they will depart the oversea area. **Over**the-road vehicles will require agricultural inspection, regardless of where the vehicle was used overseas and regardless of the area from which the vehicle was shipped.

b. Human remains and transfer cases being returned to the **CTUS** for interment will be examined at point of origin by an MCI in conjunction with or following, required mortuary inspections. Examination, to include interior of cases, will be conducted prior to closure and sealing of the outer container shipping case.

5-1

..>, & ..>,,+;,

- c. Closed loop and special repair activity repairable spare parts, and similar items for which the destination in the CTUS is predetermined, will be inspected/examined at point of origin." The inspection/examination should be accomplished when the shipment is being assembled, crated, containerized, or otherwise prepared for shipment.
- d. When items are returned to the CTUS from depot or other stocks, and destination of such items is not determined until time of shipment, inspection/examination overseas is not required. However, officers in charge of facilities consolidating such items into other crates, containers, or similar cargo transporters, will establish procedures to preclude the introduction of contraband.
- e. Immediately upon completion of the inspection/examination, DD Form 1253 (Military Customs Inspection (Label)) (fig. 6-7) or DD Form 1253-1 (Military Customs Inspection (Tag)) (fig. 6-8), as appropriate, will be properly executed, authenticated by official stamp and signature, and securely affixed to the outside of each container of articles inspected/examined. Execution and attachment of the label or tag will be accomplished by the MCI.
- f. DOD-sponsored cargo, which is classified for security or other reasons, may be impounded at the US port of entry upon a request by a US Customs official that the cargo be inspected/examined. A qualified and properly cleared representative of the DOD component or other agency to which the cargo belongs, will determine the authenticity of the classification. After the determination, the shipment may be inspected/examined by properly cleared customs officials in the presence of the above-mentioned representative.
- g. All DOD-sponsored cargo entering the CTUS will be subject to reinspection/reexamination by US Customs and or/Agriculture officials at the first port of entry, as a spot check, for purposes of validating procedures and standards of the Military Customs Inspection Program. The degree of reinspection is the sole prerogative of the border clearance offi-

cials. All shipments considered suspect by either the MCI (so noted by redlining the DD 1253) or by the US border clearance officials will be reinspected/reexamined.

- 5005. **Entry procedures.** Operators of air and ocean terminals within the CTUS will establish coordination with the District Director of Customs responsible for their area and will prepare and provide customs documentation when required. While local practices may vary to a degree, the following procedures are generally applicable:
- a. When DOD-sponsored cargo arrives at a military air or ocean terminal, US Customs and Agriculture officials will be provided a legible copy of all cargo manifests for material on the vessel or aircraft. In addition, the following forms will be provided, as appropriate-
- (1) When articles (other than military scrap or surplus) belonging to DOD are imported for further use by DOD as returned products of the United States entitled to free entry under item 800.00, Tariff Schedules of the United States (TSUS), a Certificate in Lieu of Other Entry Documentation Covering Articles of Returned US Products for Use by the Department of Defense (fig. 5-1) will be provided.
- (2) For material procured from foreign sources, which is imported for the sole purpose of transiting the CTUS to another point outside the CTUS, Customs Form 7512 (Transportation Entry and Manifest of Goods Subject to Customs Inspection and Permit) (fig. 5-2) will be provided to the customs officials at the US" port of exportation.
- b. The entry of cargo classified as "emergency purchases of war material abroad" or "supplies for vessels or aircraft operated by the United States" will be accomplished as outlined in Armed Services Procurement Regulation (ASPR 6-603). Cargo classified as "duty-free entry of listed Canadian supplies" will be entered as specified in ASPR 6-605.
- c. Customs Form 3461 (Application and Special Permit for Immediate Delivery) (fig. 5–3) will be utilized for entry of perishable and other articles when other documentation is not available and immediate delivery is necessary. Mili-

27 May 1977 DOD 5030.49-R

tary installation commanders should make arrangements at the nearest US Customs office to have an immediate delivery permit on file, for a fixed or indefinite period of time.

d. When material entered under paragraph 5005a(2) above is exported by ship, the terminal operator will prepare US Department of Commerce Form 7513 (Shipper's Export Declaration for In-Transit Goods) (fig. 54), and provide it to the carrier for submission to the appropriate customs officer. Commerce Form 7513 is not required for shipments exported by air.

e. When DOD-sponsored cargo is transported by rail, highway, or inland waterway to a destination within the CTUS, or when such cargo is delivered to a commercial air or water terminal not operated by the military, the transportation officer responsible for the area within which the destination or the terminal lies will accomplish the customs documentation outlined in paragraphs 5005a and 5005b above. If cargo so delivered arrives without the proper documentation, for good and sufficient reasons, it will be entered as prescribed in paragraph 5005c above.

Consult customs officer or Part 18, Customs Regulations, for the appropriate number of copies required for entry, withdrawal, or manifest purposes.

For the purpose of transfer under the cartage or lighterage provisions of a proper bond to the place of shipment from the port of entry, extra copies bearing a stamp or notation as to their intended use may be required for local administration.

As the form is the same whether used as an entry or withdrawal or manifest, all copies may be prepared at the same time by carbon process, unless more than one vessel or vehicle is used, in which case a separate set of manifest must be prepared for each such vessel or vehicle.

Whenever this form is used as an entry or withdrawal case should be taken that the kind of outry is plainly shown in the black in the

Whenever this form is used as an entry or withdrawal, care should be taken that the kind of entry is plainly shown in the block in the upper right-h-d comer of the face of the entry.

This form may be printed by private parties provided that the supply printed conforms to the official form in size, wording, arrangement, and quality and color of paper and ink. For sale by District Directors of Customs.
